

West Hants Regional Municipality Municipal Document Review

May 14th, Planning and Heritage Advisory Committee

Project Team Introductions

West Hants Regional Municipality

Key Role

- Project oversight and coordination of Consultant team
- Review of project deliverables
- Organization of public engagement activities

WSP

Key Role:

- Project management
- Preparation of project deliverables
- Delivery of public engagement activities

Municipal Staff

Kari Fougere, MCIP, LPP – Acting Director of Planning and Development

Alex Dunphy, MCIP, LPP – Senior Planner

Will Hong – Planner

Consultant Team

Gregory Bender, MCIP, RPP - Project Manager

Courtney Laurence, MCIP, LPP – Deputy Project Manager

Erin Sauve, MCIP, LPP – Senior Planner

Purpose of the Meeting

- 1** Welcome and Introduction
- 2** Overview of Project Process and Updates
- 3** Community and Stakeholder Engagement
- 4** Overview of Final Draft Municipal Planning Strategy & Final Draft Land Use By-law
- 5** Next Steps

Current Planning Documents

Municipality of the District of West Hants

- Municipal Planning Strategy (2008)
- Land Use By-law (2008)
- Subdivision By-law (2008)

Town of Windsor

- Municipal Planning Strategy (2005)
- Land Use By-law (2005)
- Subdivision By-law (2012)

Town of Hantsport

- Municipal Planning Strategy (2010)
- Land Use By-law (2012)
- Subdivision By-law (2010)

West Hants Regional Municipality
Municipal Planning Strategy
Land Use By-law
Subdivision By-law

Project Objectives

- Consolidate, modernize and align the planning framework
- Improve clarity, efficiency, and predictability
- Support complete, inclusive communities
- Plan for sustainable and resilient growth
- Reflect community values and priorities

Project Work Plan

Phase 1

Project Start-Up

- Introductory Project Team Meetings
- Council & Planning and Development Issues Identification Workshop
- Communications and Engagement Plan

Phase 2

Background Review & Visioning

- Data Collection
- Background Review and Policy Directions Report
- Consultation Cluster #1

Phase 3

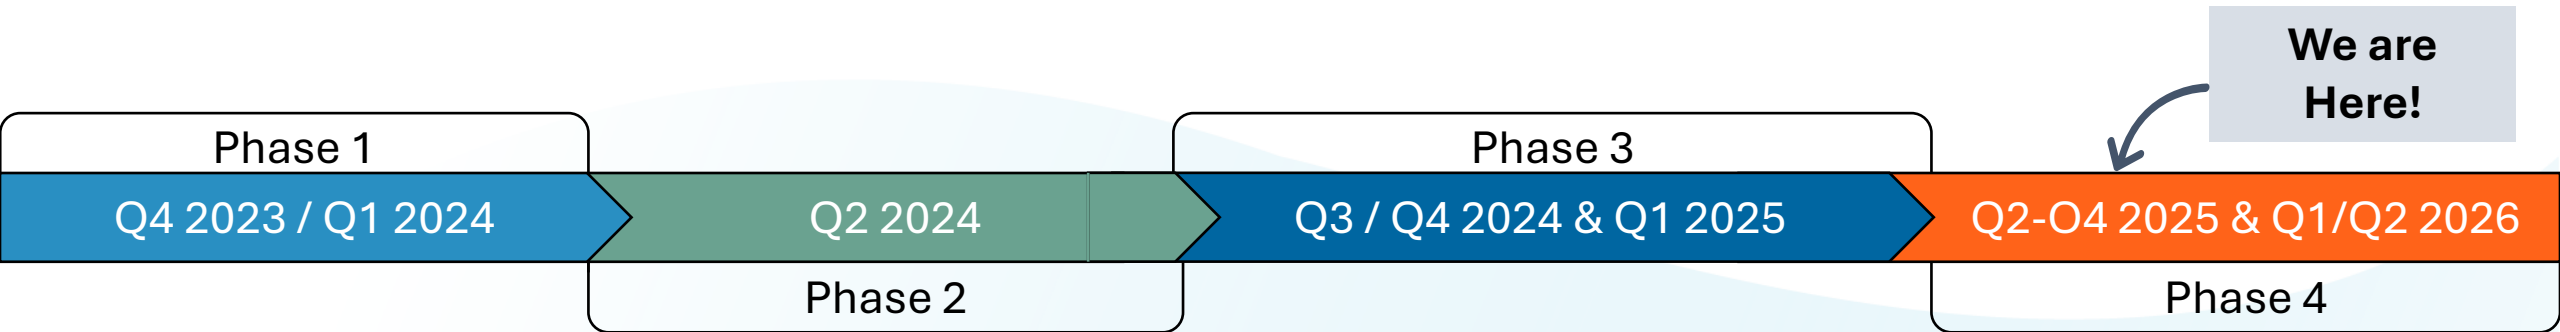

Prepare Regional Planning Framework

- Draft MPS, LUB, SBL
- Feedback from Project Team
- Consultation Cluster #2

Phase 4

Refinement and Finalization

- Final MPS, LUB, SBL
- Feedback from Project Team
- Final Public Meeting
- Council Adoption

Community & Stakeholder Engagement

Community and Stakeholder Engagement

Public Open Houses

Public Open House #1

Project Introduction and Launch of Community Survey
March 27, 2024

Virtual Public Open House #2

Key Changes to Draft Documents
June 2, 2025

Public Open House #3 #4

Key Changes to Draft Documents
June 3 and 5, 2025

Online Visioning Survey

Open from March 28th, 2024 to April 17, 2024
Total of **279** Survey responses

Council & PAC/HAC Meetings

PAC/HAC Visioning Workshop – March 18, 2024
Council Workshop – October 1, 2024
Council Key Changes Presentation – September 18,
2025

Project Website

Ongoing updates to Municipality project website:
<https://www.westhants.ca/plan-review.html>
and Social Media Blasts on Facebook

Stakeholder Meetings

Issues & Options Workshop – March 25, 2024

What We Heard – Growth & Housing

Planned Growth, Right-Sized for Our Communities: Residents support growth that is deliberate and well planned, with development directed to appropriate areas while protecting local character and rural identity.

More Housing Options for All Stages of Life: The community consistently called for a wider range of housing including affordable, multi-unit, and seniors' options, located where infrastructure already exists.

Building Up Where It Makes Sense: There was general support for increased density and height when focused in Growth Centres, while protecting viewplanes and neighbourhood character.

What We Heard – Mobility & Community

Improving Transportation Choice and Safety: Participants emphasized safer walking and cycling routes, better connections between communities, and exploring transit options, while recognizing rural travel realities.

Valuing Parks, Trails, and Access to Nature: Trails, natural areas, waterfronts, and open spaces are highly valued and should be protected, enhanced, and remain accessible to residents.

Honouring History and Sense of Place: Protecting historic sites, cultural landscapes, and community identity was seen as essential to shaping growth that feels local and meaningful.

What We Heard – Environment & Climate

Protecting Water, Land, and Natural Systems: Protecting freshwater, forests, wetlands, agricultural lands, and coastal areas was a top priority across all engagement phases.

Planning for Climate Resilience: Residents highlighted the need to address flooding, erosion, wildfire risk, and infrastructure vulnerability through more climate-resilient land use decisions.

Supporting Sustainability with Care: Participants generally support sustainability and renewable energy, with strong emphasis on appropriate siting, environmental protection, and local community benefit.

Vision & Guiding Principles

New Vision for the Municipality's Municipal Planning Strategy

The new Municipal Planning Strategy will include a refreshed vision for WHRM for the next 25 years.

West Hants Regional Municipality envisions a future where inclusivity, innovation, and resilience create a vibrant community that balances urban and rural lifestyles. The Municipality is dedicated to preserving natural landscapes, rural character, and agricultural heritage through sustainable development and economic prosperity, while honouring its rich history and diversity.

Guiding Principles

Foster a welcoming, inclusive community that offers a high quality of life for residents and attracts both tourists and new residents, including youth, young professionals, seniors and families

Create healthy, safe, vibrant, and mixed-use neighbourhoods

Encourage an adequate supply and diverse range of different housing types including affordable and supportive housing that meet the housing needs for all residents

Guiding Principles

Promote climate resilience by implementing strong adaptation measures to help protect against extreme weather and coastal risks, and encourage sustainable practices among residents, businesses, and organizations

Support a balanced economy that values both traditional and modern economic sectors, fostering innovation and investment

Promote connectivity through integrated transportation systems and infrastructure

Celebrate and protect the cultural and built heritage values and resources

Questions?

Summary of Major Changes- General Changes to the LUB and MPS

- **Improvements/Format and Structure**

- Documents have been reformatted to be more readable/user friendly.
- Diagrams/illustrations have been included where clarification is needed.
- Consolidated and renamed some sections for greater clarity.
- General provisions will be consistent.
- New regulations to be reasonably consistent with provincial legislation and the New MPS (e.g., Buffers).
- Updated Definitions with illustrations where necessary.
- Consolidated and reduced the number of zones.

Summary of Major Changes- Settlement and Growth

Growth Hierarchy:

- Growth Centers (Falmouth, Windsor, Hantsport, Three Mile Plains)
- Local Centers
- Agricultural Areas
- Resource Areas

Growth Centre Policies:

- Windsor:
 - Higher Density
 - Downtown Windsor as the Commercial Core of the community
- Three Mile Plains and Falmouth:
 - Medium to low density development by as-of-right or site plan approval.
- Hantsport:
 - Medium-low density development in the interim. Plan to bring forward amendments once capacity is no longer an issue.

Summary of Major Changes- Settlement and Growth Cont.

Housing Accelerator Fund Initiatives:

- Density Bonusing, increased density as-of-right and adjusted parking requirements carried forward in drafts.

Industrial Development:

- Zones were evaluated and combined and streamlined where appropriate, within and outside of Growth Centres.

General Resource Zones:

- Only area for private road developments.
- Maintain consistency with this zone and designation being the primary focus for resource related uses. Area not intended for increased residential density.
- Zone and designation allow for some rural development, while protecting the area for future resource type uses.

Summary of Major Changes- Environment & Sustainability

Coastal Protection and Watercourse Separation:

- Policy direction to do future work with Minas Basin Flood Mapping and future work to differentiate watercourse setbacks between coastal shorelines and all other watercourses.
- Establish clear classifications of watercourses.

Flood Risk Areas (Environmental Constraints Overlay):

- Combine the previous overlays
- Enable staff to establish additional regulations regarding infilling, topsoil removal, and alternation of topography within the Environmental Constraints Overlay.
- Continue permitting necessary infilling and alteration of topography for the development of recreational uses not involving any buildings.

Summary of Major Changes- Environment & Sustainability Cont.

Protection and Access to Fresh Water Resources:

- Policy direction to support the implementation of the Source Water Protection Plan, and review and update the Plan, as needed.
- Enable regulations to control erosion and sedimentation (e.g., buffers, site plan criteria)
- Ensure equitable access to freshwater resources (e.g., minimizing impacts on water resources, future work on climate risk and drought mitigation)

Solar Energy

- Establish requirements for solar arrays in all zones, addressing the absence of solar energy provisions in previous planning documents.
- Establish requirements for community solar arrays and agrivoltaics by site plan approval
- Discourage placing community-scale solar farms on land where municipal services are available.

Summary of Major Changes- Transportation and Mobility

- Policy direction to develop and implement a Transportation Master Plan, which covers the entirety of the Municipality.
- Incorporated recommendations from the Active Transportation Plan (e.g., bicycle parking requirements, active transportation connection, trails permitted widely).
- Policy direction to develop and implement a Public Transportation Feasibility Study for a public transportation system in collaboration with existing transit and rideshare providers.
- Road classifications referenced in mapping rather than text.

Summary of Major Changes- Infrastructure/Stormwater Management

- Updates to stormwater management requirements :

Stormwater Management Plan Required:	Lot Grading Plan Required:
Residential development exceeding 7 units in the R-3 zone	All other new main buildings within Growth Centres (unless waived)
Development within Area of Concern	
Development Agreements and rezonings*	

- Any new or upgraded sanitary sewer connection will require a downstream wastewater capacity assessment.

Summary of Major Changes- Recreation and Parks

- Policy direction to maintain park and open space priorities in line with municipal goals and resources.
- Enable regulations on skate parks and dog parks to reduce the impact on neighboring properties (e.g., min lot size, setbacks, buffers, etc.).

Summary of Major Changes- Culture and Heritage

- Requirements to help protect the view plane from Fort Edward, extra requirements for any development proposal that may impact the views.
- Architectural Control Districts (e.g. ability to development additional districts in the municipality).

Summary of Major Changes- Agriculture

Agriculture:

- Consolidated policies, updated definitions, and adding clarity.
- Strengthen Prime Agriculture zone to add more protection of farmland.

Urban Agriculture and Household Livestock:

- Combined the two and limitations household livestock within Growth Centres and more clarity around where household livestock is permitted:
 - Not permitted in Hantsport
 - Other Growth Centres permit up to 4 laying hens
 - Limits on roosters and turkeys for lots under 3 acres (outside Growth Centres)

Summary of Major Changes- Plan Implementation and Amendments

Development Agreement and Amendment Criteria:

- Revised criteria for considering development agreements, rezonings, and other amendments to the Land Use By-law. These include:
 - Revised language to remove subjectivity where possible;
 - Considerations around stormwater management;
 - Considerations around mix of housing types;
 - Recreation;
 - Connection to active transportation infrastructure;
 - Mitigation of impacts on existing uses;
 - Considerations for universal accessibility and barrier-free design
- Increased options for development by development agreement as an alternate to rezoning.

Next Steps

- Review feedback from the Committee
- Prepare final package for the Committee including draft recommendations to Council
- Present final package to the Committee for recommendation
- Recommendations to Council for consideration
