Good morning Councillors,

You may be aware, there was another combined sewer/ stormwater overflow yesterday afternoon. This time it took about 14 minutes of heavy rain to cause the catch basins to reach capacity and mixed stormwater and sewage to flood the street on (south) Stannus. Along with the accompanying strong sewer odour.

I cannot stress enough the sheer panic these events cause as we watch, completely at the mercy of the weather.

Today, we are hearing that hurricane Beryl could potential bring torrential rain to our province. After yesterday's 20 minute rainfall, I am afraid of what may occur here later this week.

I have attached a very short video of yesterday's overflow taken from my deck, for your consideration.

Please help by using your authority as Councillors at this evening meeting and provide actionable support. We cannot be expected to endure this any longer.

Thank you for your attention and support to this ongoing health and safety crisis.

Respectfully,

Jennifer Moore
