Hello,

As you know, residents of Stannus Street were exposed another extreme CSO event on July 11, 2024.

During this event I tripped over a hose and fell into combined storm and sewer water (approx 2.5 feet depth). Although I only sustained minor cuts, scrapes and bruises a fire fighter suggested I seek medical attention which was confirmed by an 811 nurse.

I was treated in the ER at the Hants Community Hospital. I receive the Tdap vaccination, Hepatitis A and B vaccinations and had a blood culture. I was treated for gastrointestinal symptoms, as well as symptoms of anxiety.

I cannot find the words to describe the distress experienced before, during and after yet another 1:100 year flooding event in 36 months. I hope words are not needed and with a sense of urgency, action will be immediate.

We continue to live in, and are exposed to, an ongoing health and safety crisis.

Regards,

Jennifer Moore
