Dear Councillors,

Please do not support the wind projects.

The blades are made of fiberglass, and when they break our garbage, they cannot be recycled. They cannot be incinerated. They have to be buried in a landfill, the majority of the rest of the unit is also non-recyclable except for the metal components. Each one requires a diesel generator in order to keep the glycol warm for cooling the units. Please have this verified by the representatives of Ever wind.

Cheers,

David Markle
